## refrigeration technology

### The global power of local partnerships

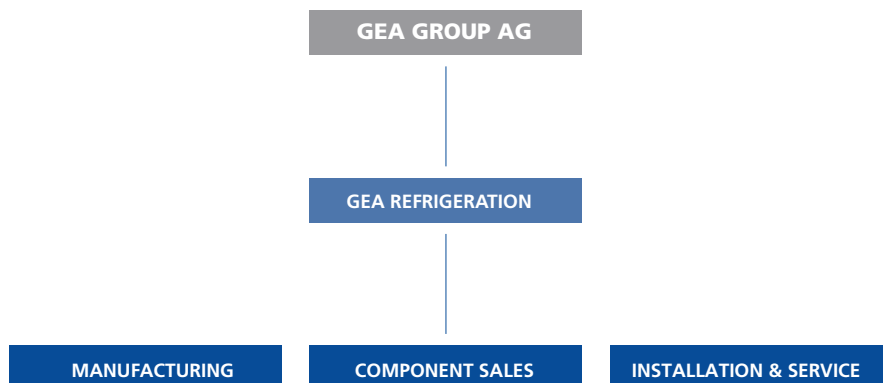

GEA Refrigeration, the refrigeration division of GEA Group, is the worldwide market leader in industrial refrigeration. We offer our customers high-quality refrigeration systems and components to help facilitate their industrial operations. This is largely thanks to the robust organization at GEA Refrigeration. A worldwide network of factories, installation and service companies and sales offices guarantee that the customer's solution is always within reach.

Our customers operate in markets such as the food industry, oil & gas and (petro) chemical industries, storage and distribution as well as the maritime, public utilities and leisure. The services offered by GEA Refrigeration cover the entire spectrum of refrigeration technology:

- system design
- component manufacturing
- installation
- service & maintenance
- commissioning

Whichever refrigeration solutions you require, GEA Refrigeration has the proven expertise, technologies and personnel for you. Whether it concerns a mega cheese warehouse in Spain, freezing shrimps in North Africa, keeping gases in liquid form during ocean transport, controlling the temperature in clean-rooms, cooling freshly poured

concrete or building a skiing hall in Dubai. All services are the result of a thorough understanding of the customer's needs and are based on continuous innovation in refrigeration solutions. All this is made possible by a company with a history of 150 years and based on a worldwide network of 45 companies and around 3,800 employees.

## Your local partner

GEA Refrigeration has set up an international network of sales offices that help ensure its components are on offer to installation contractors. GEA Refrigeration Components are authorised dealers for the leading brands: AWP, Aerofreeze, Geneglaze, Grasso, Goedhart, Küba, Raffel and Searle and we act worldwide as agents for the manufacturers. Since you always work with local people, you will always find a contact person that is familiar with your market, speaks your language and understands your culture.

The GEA Refrigeration Components sales engineers give advice on the selection of our innovative, high-quality components. Whenever needed they will also provide the related technical support necessary for successful application of these components within the design of your (semi-)industrial installations. They will always aim to enjoy a warm and lasting relationship based on respect and integrity. They have at their disposal a wide range of components as well as substantial knowledge of the customer-specific markets and the necessary technological solutions.

familiar with your market

Our sales engineers will assist you in translating your customer's requirements into customized refrigeration solutions. In doing so they take account of all aspects of reliability, energy efficiency, total cost of ownership and environmental considerations.

GEA Refrigeration Components handles the complete order and after-sales service and will keep you the installation contractor informed of recent developments in our range of components. If necessary GEA Refrigeration's in-house product specialists are available for consultation.

component specialists

What components do we supply?

- piston compressors
- screw compressors
- chillers
- air coolers
- condensers
- ice machines
- freezers
- valves
- packaged systems
- dryers
- electronic control
- purgers

## customized solutions

### Worldwide engineering excellence

With about 250 companies and 20,000 employees in 50 countries, GEA Group AG is a technology leader on a world-wide scale. In 2007 the group achieved a turnover of 5.2 billion Euros. The global group focuses on mechanical engineering in two fundamental sectors, namely heat transfer (heating, cooling, freezing) and mass exchange (separating, drying, distilling, pumping, dosing and stacking). GEA manufactures components, systems and complete production lines. For the customer this largely involves customized solutions.
